

Bittium Tough Comnode Audio Extension™

Bittium Tough Comnode Audio Extension is an easy-to-use audio extension accessory for Bittium Tough Comnode™ and Bittium Tough VoIP Field Phone™ 2 communication devices.

It provides additional audio functionalities and interfaces, such as hands-free functionality with integrated microphones/speaker, additional connectors for headset/handset and external speaker interface. The functions of the accessory can be easily controlled via Comnode's or Field Phone 2's user interface.

The Audio Extension can be installed on a separate mounting plate together with either device. The mounting plate can be used for both wall and desk installations.

Benefits

- › Provides additional audio functionalities and interfaces for Bittium Tough Comnode and Bittium Tough VoIP Field Phone 2
- › Hands-free functionality
- › Hook-on / hook-off detection
- › Hotline call
- › Enables audio routing to external speaker
- › Easy installation to different environments with mounting plate
